

Merit[®] heat pumps offer these features:

PermaGuard™ cabinet for long-lasting protection against rust and corrosion

Proprietary cabinet design that makes them more durable and easier to install and service

Dual-fuel compatible with Lennox furnaces for added cost savings

Seasonal Energy Efficiency Ratio (SEER2)

This rating determines a heat pump's efficiency. The higher the SEER2 rating, the more energy-efficient it is.

Heating Seasonal Performance Factor (HSPF2)

A heating efficiency rating for heat pumps. A higher-rated HSPF2 heat pump will result in less energy use and increased energy savings over the life of the system.

Dual-Fuel Compatibility

An HVAC system that pairs an electric heat pump with a gas furnace and alternates between the two fuel sources to maximize comfort and efficiency.

ENERGY STAR® Certified

HVAC equipment with the ENERGY STAR label meets or exceeds federal guidelines for energy-efficient performance.

Quantum™ Coil

With years of rigorous testing under the most extreme conditions, our Quantum Coil—featuring a proprietary aluminum alloy exclusive to Lennox—is designed to weather the harshest elements.

Warranty Your Way™

All Merit models come with a 5-Year Limited Warranty on compressors and a 5-Year Limited Warranty on covered components. A 10-Year Extended Limited Warranty is available with product registration. For more information, visit www.Lennox.com/WarrantyYourWay.

How does single-stage, two-stage & variable-capacity work?

72°

Single-Stage

Unit is either on or off, creating wide temperature swings.

72°

Two-Stage

Unit runs at either low or high speed, using the lower speed 80% of the time.

72°

Variable-Capacity

Unit runs at low most of the time, using only the amount of energy necessary to meet comfort need.
